Professional Summary

React JS Developer with 3 years of experience building scalable, responsive, and user-friendly web applications. Strong expertise in React Hooks, component-based architecture, state management, and REST API integration. Experience working with Node.js and MongoDB for backend integration. Passionate about writing clean, maintainable code and delivering high-quality frontend experiences.

Experience

Binary Republik

June 2023 – Present

Software Developer — Ahmedabad, Gujarat

Domain: HRMS

- Built role-based dashboards and multi-step forms using React.js, React Hooks, and controlled components for interview scheduling, onboarding, and evaluation workflows.
- Implemented dynamic validations with reusable form logic and conditional rendering driven by workflow stages and approval rules.
- Developed approval and review screens with commenting, status updates, and confirmation flows using state-driven UI patterns.
- Integrated REST APIs and collaborated with Node.js/Express backend services for efficient data flow and application functionality.

Domain: Apparel Manufacturing — Admin & Reporting Portals

- Developed an authenticated Admin Portal using React.js, React Router, and protected routes to manage roles, permissions, and business security rules.
- Built a Reporting Portal embedding Power BI dashboards using React components and dataset-driven layouts for operational reporting.
- Integrated REST APIs using Axios/Fetch with structured loading, error handling, and async state management for reliable data operations.
- Refined navigation, tabular views, and reusable UI components to improve usability for apparel brand stakeholders.

Domain: Post Office Portal

- Migrated Classic UI screens to modern React.js architecture using functional components and hooks to improve maintainability and UX.
- Built dashboards with filtering, search, and CRUD capabilities using custom React components and REST API integration.
- Implemented approval and acknowledgment flows enabling reviewers to approve, reject, or comment directly within the UI.
- Added global document search across PDFs, images, and content using API-based indexing and unified search access.
- Executed large file uploads with chunking, progress tracking, and retry logic, working with backend APIs and MongoDB-based data handling.

Skills

- Frontend: React JS, JavaScript (ES6+), TypeScript, HTML5, CSS3
- Backend: Node.js, Express.js
- Database: MongoDB
- React Concepts: Hooks, Functional Components, State Management, Props, Lifecycle
- Web Development: REST APIs, Responsive Design, Client-side Routing
- Tools: Git, VS Code, Browser DevTools

Education

Saffrony Institute of Technology, Mehsana
B.E. in Computer Engineering, CGPA: 8.70

2019 – 2023
